PROFILE

I completed my graduation from JAMK University of Applied Sciences, majoring in Software Development, proficiency in full-stack development and web security, along with knowledge of cloud platforms such as Azure and AWS, as well as DevOps. Additionally, I have practical experience managing a team as a Scrum Master using Agile methodologies. I am passionate about coding, which drives me to create unique and innovative solutions consistently. My strong communication skills, creativity and enthusiasm for collaborative teamwork distinguish me from others. With a growth-oriented mindset, I am always eager to learn new technologies and embrace new challenges, which encourages me to contribute effectively to team success.

EDUCATION

Jamk University of Applied Sciences

(August 2022 - May 2025)

*Information and Communication Technology, Bachelor
of Engineering*

Graduated with a GPA of 4.11/5.0, majoring in Software Development. During my studies, I developed various web and mobile applications. You can view my projects at www.ashutoshburman.com.

Projects:

Open source project by Combitech Oy and CSC

(January 2024 - April 2024)

Contributed to Combitech Oy and CSC on open-source projects using TypeScript, Docker, GitLab CI/CD, Redis, CSC Cloud, Linux and JavaScript. Implemented accessibility features, fixed security vulnerabilities, and modernised UI with GSAP and other animation libraries. Applied Agile methodologies and develop communication, teamwork, time management, and task coordination skills. Delivered a fully functional real-world project as per client requirements.

City of Jyväskylä - Jyväskylän kaupunki

(January 2023 - April 2023)

Multidisciplinary Business Project :

This project improved my coordination and communication skills in a multidisciplinary group, planning project goals and objectives and managing time. I delivered the solution using the data gathered through surveys and Interviews, as well as a research report with a communication plan to the client.

HOBBIES

- Listening to music
- Traveling
- Reading books
- Ice skating
- Snowboarding
- Swimming

WORK EXPERIENCE

Music.Info Finland Oy, Jyväskylä, Finland

Jan 2025 - May 2025

Thesis work

- Developed an in-depth thesis on AI-driven code migration from AngularJS to Angular, accelerating the company's migration process by 80% and providing comprehensive insights into AI capabilities through practical application.

Outlier

January 2025

AI Trainer - Freelance

- Enhanced generative AI performance by training models on coding and language tasks, providing concise feedback to improve responses. Gained experience working with the latest AI models through a freelance opportunity at Outlier.

iPark - Affordable EV Charging Platform, Helsinki, Finland

Internship - Mobile Application Developer

Nov 2024 - Jan 2025

- **Mobile Application:** Design and delivered a full-featured mobile application for booking EV charging stations, which allows users a seamless experience that covers everything from finding stations and reservations to payment and history tracking
- **Tools Used:** *React Native, Tailwind CSS, Bun and Figma.*

Music.Info Finland Oy, Jyväskylä, Finland

May 2024 - Sep 2024

Internship - Software Developer

- **Mobile Application:** Developed an AI powered music stream application from ground up with IOT devices integrated(Smart watch) and third-party services such as Spotify using cross-platform framework. This added a new product to the company.
- **Tools used:** *React native, TypeScript, REST APIs, OAuth 2.0, SDKs, AI APIs, Figma, Spotify APIs and IOT communication protocols.*
- **Refactored Legacy Project:** Improved search functionality by 50% by replacing outdated APIs with a latest APIs which optimized solution and enhanced query handling and access to a more comprehensive dataset.
- **Tools used:** *Angular JS, APIs, JavaScript, Testing.*
- **Legacy Application Modernisation :** Improved legacy application performance by transforming into a new framework from AngularJS to Angular, resulting in significant improvements to security, scalability, and maintainability.
- **Tools used:** *Angular SSR, REST APIs, TypeScript, Docker, Nginx, PrimeNG.*

- **Scrum Master:** Enhanced team collaboration and communication by introducing a fun interactive sprint meeting format. Encouraging a collaborative environment during sprint planning and retrospectives while managing Jira and Confluence to keep an eight-developer team aligned and informed
- **Tools used:** *Jira, Confluence.*
